

Order Fulfillment

Automate Order Fulfillment

Fulfill shipments much faster with Zenkraft. Zenkraft integrates with any standard, custom or ISV object in Salesforce. Ship one-by-one, in bulk or automatically using Process Builder.

Ship in Bulk or using Process Builder

- Fully automate order fulfillment from any object.
- Book shipments when parent objects change e.g. an Order is paid.
- Connects directly to Printers and Scales include Zebra and Metler and Toledo.
- Tracking data automatically moved to parent object.

REQUIRES SETUP

Pick and Pack Stations

- Scan products into cartons manually
- Auto-pack products using a boxing algorithm
- Generate packing slips for customers
- Print packing slips to thermal printers
- Direct product weight including tear weight integration from scales

Works with ERP ISVs:

“30% increase in productivity in our shipping & receiving department”
