# Zenkraft for
Commerce Cloud

Display Carrier Rates & Services in Checkout

Display real-time shipping options from the carriers and either mark-up or mark-down the costs. Add carrier services such as UPS MyChoice in the checkout price.

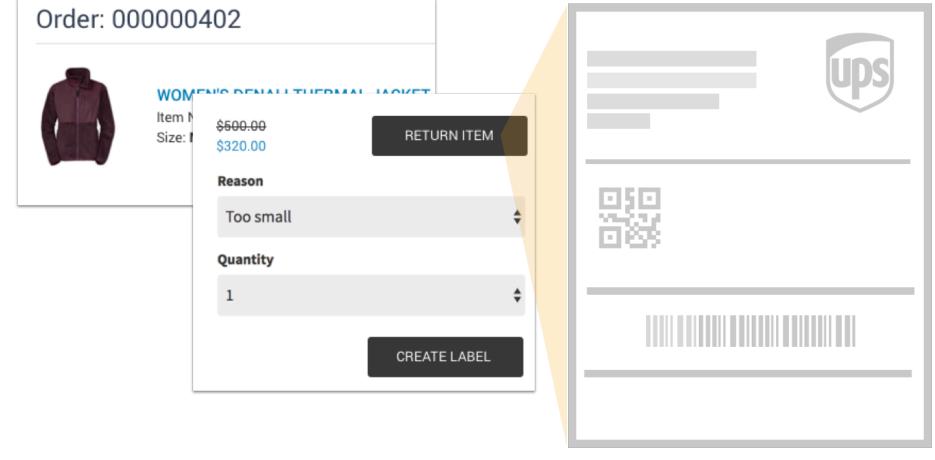

Show Order Status in Real-Time

Shipment status is automatically updated every hour for your customer. Shipping method, current status and tracking number will be displayed. Tracking status can also be included in branded tracking emails and landing pages.

Manage Returns

Users can self-generate return shipments for 50+ carriers from within Commerce Cloud. Users can either email the label to themselves (great for mobile) or print the label directly from their desktop.

Works with Every Cloud

Zenkraft runs on every Salesforce Cloud including Service Cloud and Marketing Cloud. Run reports highlighting product issues or identify serial returners using Salesforce reporting.

About Zenkraft

- 35,000+ Happy Users
