Zenkraft for
Pick and Pack Stations

1. Integrate with any object

Zenkraft's Pick and Pack functionality is enabled with one-click. You can integrate with any object and associated order lines. For instance, you can integrate with Salesforce native Order object or any Order object provided by an ISV from the AppExchange.
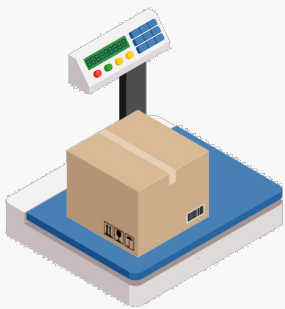

2. Pick and Pack Products

Easily pack products into containers. Once the quantity is packed you can calculate the shipping costs and print the carrier label.

Containers

	#	QUANTITY	CONTAINER NAME	* WEIGHT (LBS)	* DECLAR
✓	2	-	20x20x10 Box 1	0	0
		9	GenWatt Diesel 10kW	-	-
	1	-	20x20x10 Box 1	0	0

Products to Pack

SCAN BARCODE TO PACK

| 1 | | Go |

	TOTAL QUANTITY	ALREADY PACKED	QUANTITY TO PACK	
esel 1000kW	5	5		Pack
sel 10kW	13	13		Pack
pane 500kW	2		2	Pack

3. Scales, Scanners and Printers

- Scale integration is used to auto-populate the weight field.
- Scanner integration can be used to pack items without using the mouse or keyboard
- Shipping labels and international documents can be printed automatically once an order is packed.

4. Auto-Pack with Boxing Algorithm

Save money shipping with Zenkraft's proprietry boxing alogorithm.

Zenkraft's boxing algorithm selects the best packaging best on the product weights and their dimensions.
